Initiativer for at bedre kræftoverlevelsen

- 1998 – national kræftstyregruppe under sundhedsstyrelsen
 - Professionelle, ledere og planlæggere
- 2000 Kræftplan 1
 - Kapacitet – væsentligt i behandling og behandlingsnær diagnostik
- 2005 Kræftplan 2
 - Fokus på kirurgisk centralisering (specialeplan)
 - Begyndende fokus på forløb, ventetider delay
 - Lidt fokus på forebyggelse – forbeyggelseskommission

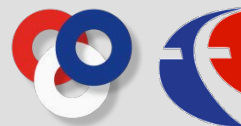

Systemdelay – alle cancertyper

fra første reaktion i sundhedsvæsenet til behandling

Rikke Pilegaard Hansen ph.d. 2008
Forskningsenheden for Almen Praksis, Århus

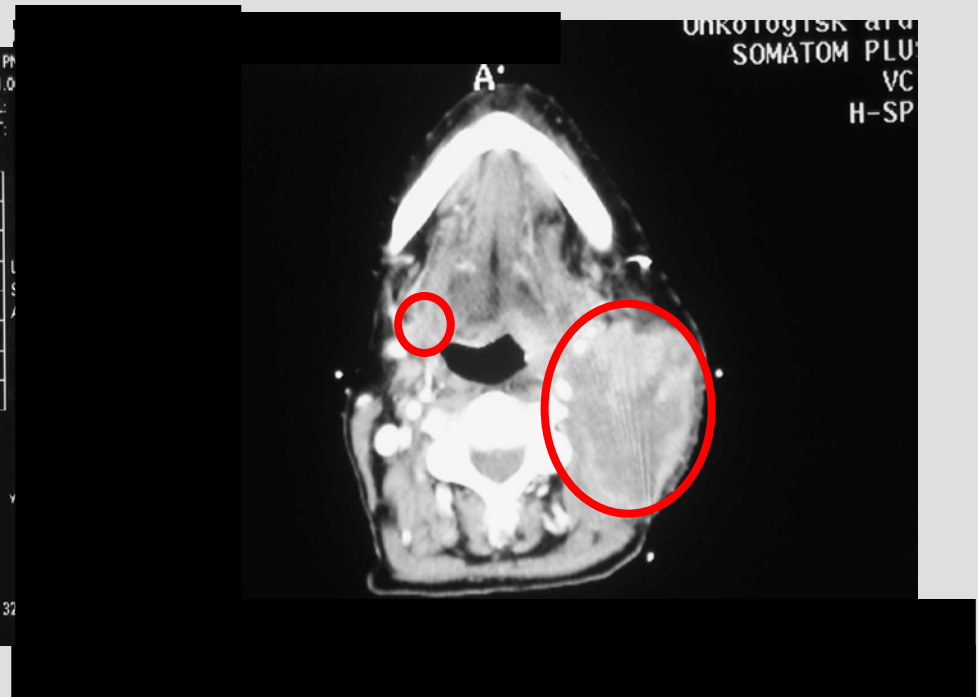

Syn for sagen: Ventetiden betyder noget!

Diagnostic scan

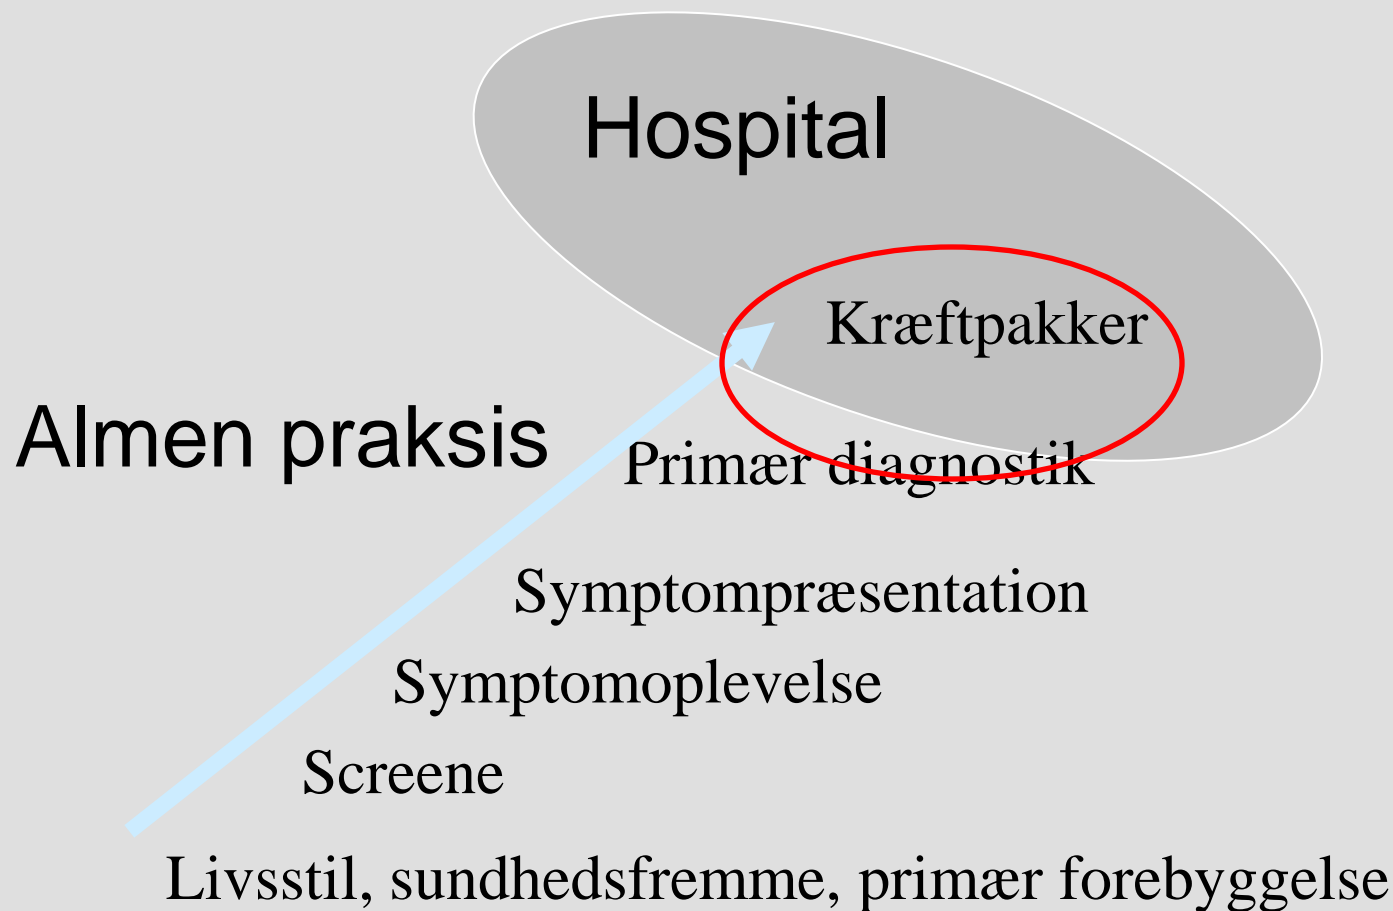

Treatment planning scan

47 dage mellem scanningerne

De multidisciplinære 'fast track' pakker

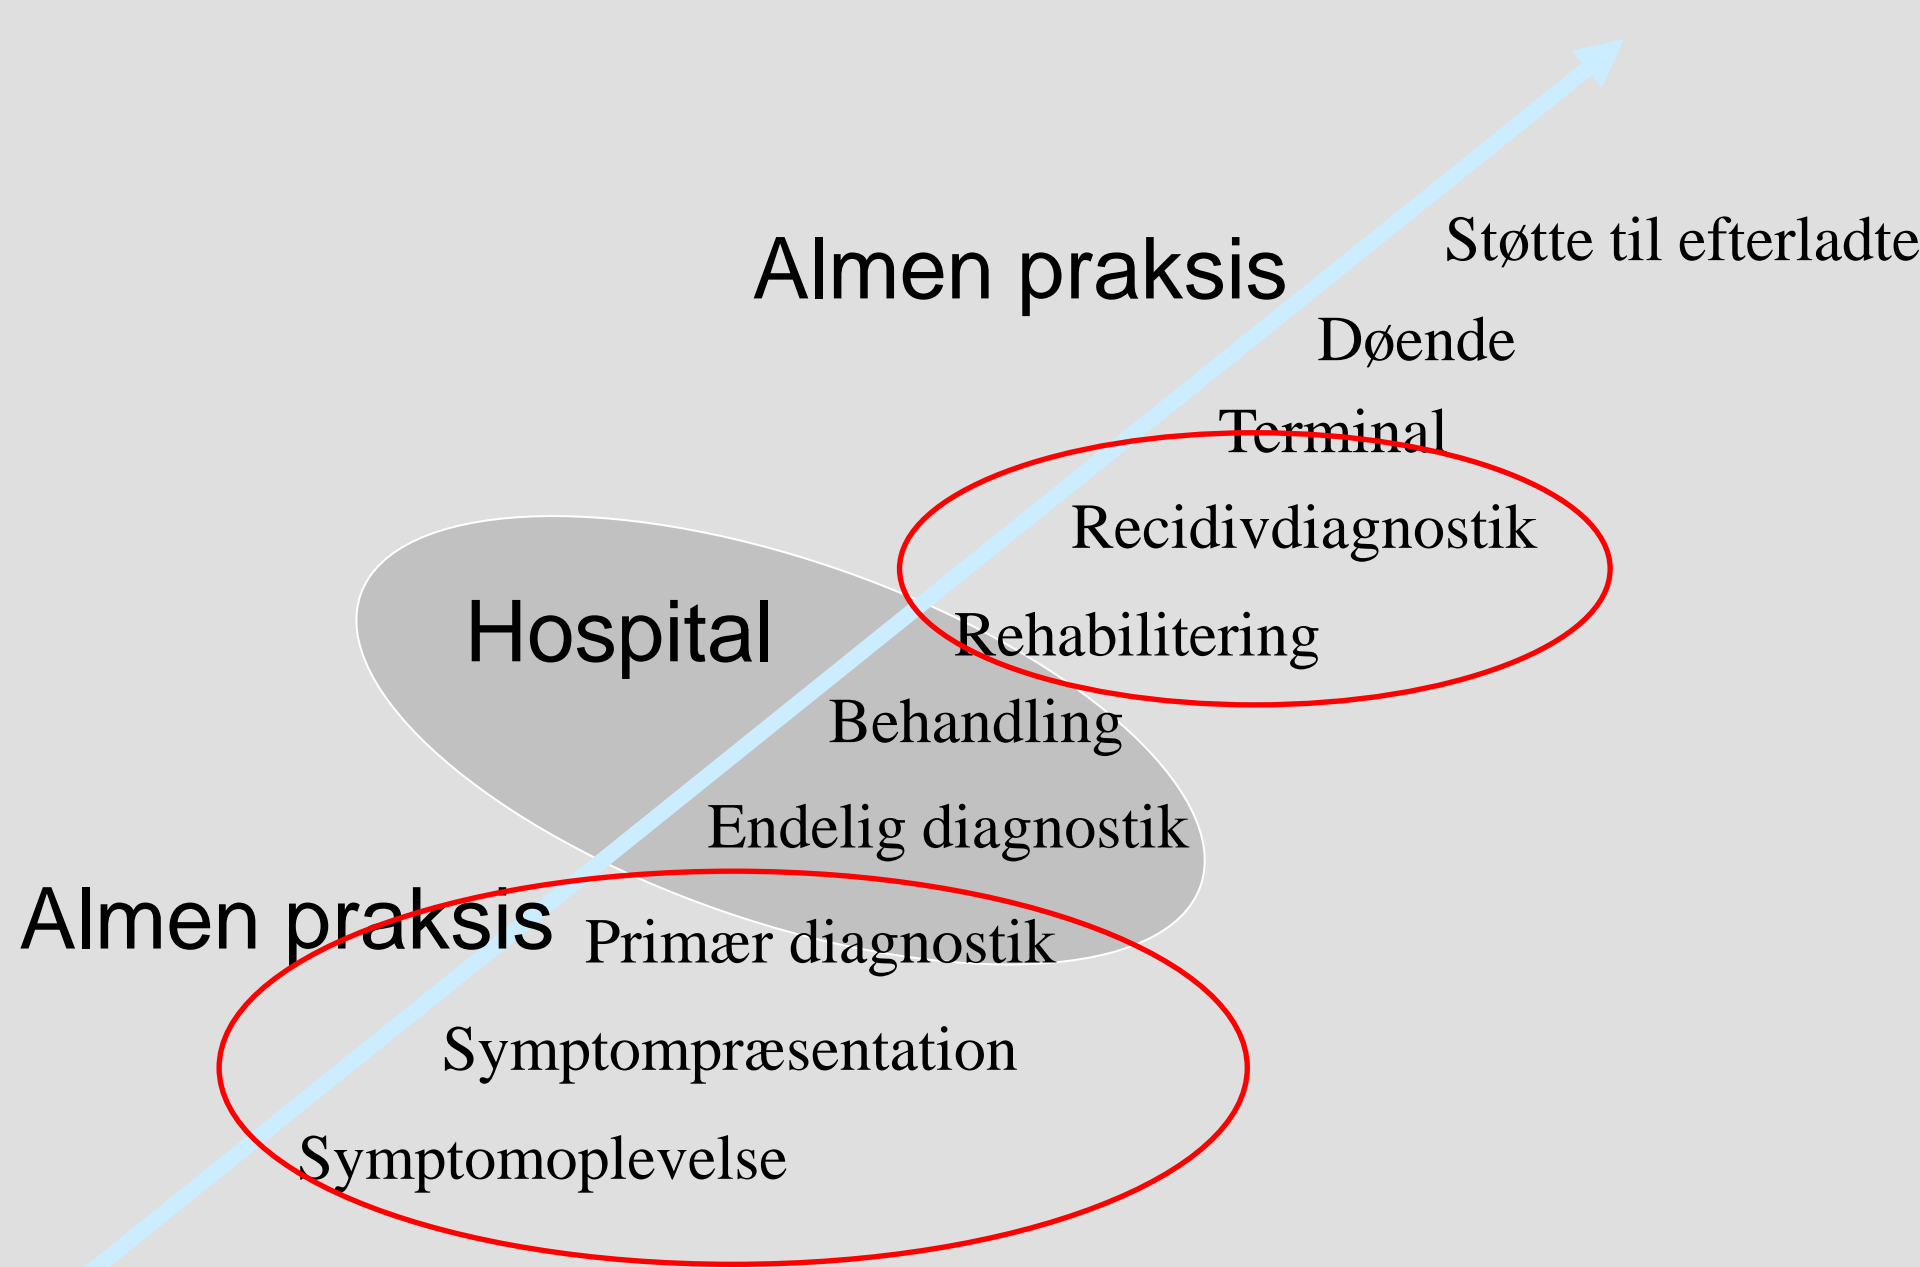

- Udarbejdes af multidisciplinære professionelle
- Processen ledes af sundhedsstyrelsen
- Dækker alle de hyppige cancertyper
- Indeholder maksimalt acceptable ventetider for hvert skridt
- Indeholder nationale behandlingsstandarder -lokal tilpasning
- Begrænses til 'begrundet mistanke' om cancer.

Fordeling af patient, læge og system delay

Hurtigere diagnostik – hvordan?

- Bedre adgang til relevante diagnostiske undersøgelser for almen praksis – eksplosionsfaren er begrænset!
- Diagnostiske centre med multidisciplinær specialistvurdering
 - mavefornemmelses henvisninger er ok!
- Indbygget læring for læge, praksis, afdeling (monitorering, feed back, audit)

En ny tankegang: "Kunden" er ikke altid (kun) patienten!
